Granny Gunn is really a strange old lady. Before she moved into our town, she lived in the country. Her farmhouse was just like a doll's house and there were grass and flowers on the roof. She lived alone but she had many animals to play with: a cow, seven chickens, two sheep, and a cat.

One day Granny Gunn became sick. The doctor told her to move into town and live with her grandson because the animals could not take her to the doctor. She was so sad that she took her cat with her to the town. Granny Gunn wasn't happy when she went into her new place. She didn't want to stay there. But she changed her mind when she went to the balcony. When she got there, she could see the mountains and the sea far away. She sat down so that she couldn't see any of the rooftops—only the mountains and the sky. Granny Gunn decided to stay after all.

The next day, there was no one at home. Granny Gunn took the bus out into the country. That night a strange sound came out of her room. What could it be? The chickens! The next morning, Granny Gunn started to feed the chickens in the living room. Granny Gunn felt like being at home in the country. **【55~ 58】****Inedia**

An 82-year-old man in India says he has nothing to eat for 70 years. Doctors from all around India are studying to learn something about him.

The man, Prahlad Jani, says he does not need to eat or drink because he gets **nourishment** from air. In India, they call something like this “inedia.” Jani is not the only or the first person to have the magic power, but nobody can prove it. The human body needs both food and water. It's easy for anyone to say that he or she can live without anything to eat or drink for a few weeks or months (or even years). But they can prove it only when they are under careful observation during that time.

A study shows that Jani can live for six days without food or water. The doctors say his body does not show anything wrong from hunger or **dehydration**. The problem of this study is how long the observation is. If a person really doesn't need food or water for months or years, then he or she must be under careful observation for that long to prove it. And this is not a problem if he does not eat or drink anything from the time when he was a child.
